Professional Experience

From October 2021 to October 2023

An Agronomist at the Department of Pesticides in the Ministry of Agriculture – Gaza.

Main Tasks:

- Receiving and following up on pesticide importing requests.
- Follow up licenses of Agricultural pesticide companies and stores.
- Providing the relevant departments with technical data related to pesticides and their uses.
- Conducting extension visits to each farmer and pesticide store owner to provide technical and knowledge support.
- Writing the required reports.

From August 2021 to October 2021

Agricultural Extension Specialist with Al-Azhar University – Gaza within the project of Safe Agricultural Practices.

Main Tasks:

- Selection of farmers candidates to benefit from the project.
- Distribution of materials necessary for the cultivation process (seedlings, pesticides, fertilizers, irrigation networks, ...) to the targeted farmers.
- Conducting extension visits to each farmer to provide technical and knowledge support.
- Writing the required reports.

From June 2020 to November 2020

Field Agronomist with Job Creation Program (JCP).

In June 2020, JCP started implementing a project that targets the agricultural sector in Gaza and Northern Governorates. The objectives of the project:

Installation of a conveyor water pipe from treated wastewater wells that are being recovered in the northeastern region of North Gaza Governorate.

- Distribution and installation of irrigation networks for some farmers in that region.
- Distribution and installation of 4 hydroponics units.

My Job Duties Include:

- Follow-up of the drilling and extension of the water-conveyor pipe in the target area.
- Receiving the equipment needed to install the water-conveyor pipe and ensuring that it conforms to the technical specifications.
- Follow up on the installation of hydroponic units.
- Writing the required reports.

From August 2018 to April 2019

Trainee at Palestinian Agricultural Relief Committees (**PARC**) in Luxembourg Project
(Training Program)

Training included:

- Enhance managerial skills such as project management, feasibility study, writing reports, , business plans, and needs assessment.
- Training of trainers (TOT).
- Diagnosis and control of the most important plant pests.
- Design and installation of irrigation systems.
- Plant nutrition and fertilization.

From June 2017 to February 2018**Field Agronomist with Job Creation Program (JCP).**

In June 2017, JCP started implementing a project that targets the agricultural sector in Gaza and Northern Governorates. The objectives of the project:

- Enhancing irrigation water resources alternatives through the construction of rainwater harvesting ponds.
- Enhancing the role and the economic status of rural women through the provision of seedlings needed for house gardens.
- Enhancing the economic status of the farmers through the provision of irrigation networks, agricultural equipment, and seedlings.

My job duties include:

- Supervision on the seedlings production process in the nursery.
- Reporting.
